

Viewing Information

This photograph and visualisation is a cylindrical projection panorama. Hold this sheet at a comfortable arm's length from your eyes and curve the image through 90° and turn head to view. Alternatively, the visualisation can be laid flat and viewed by scanning left or right parallel to the sheet maintaining a 50cm viewing distance between your eye and the page.

This visualisation is a tool for assessment and is best used for comparison in the field from the viewpoint location shown. It cannot be considered a substitute for visiting the viewpoint location.

Technical Information

The technical photography, accuracy of 3D modelling and generation of visualisation is an Accurate Visual Representation. This is explanied and presented in the accompanying Technical Methodology.

Printing Note

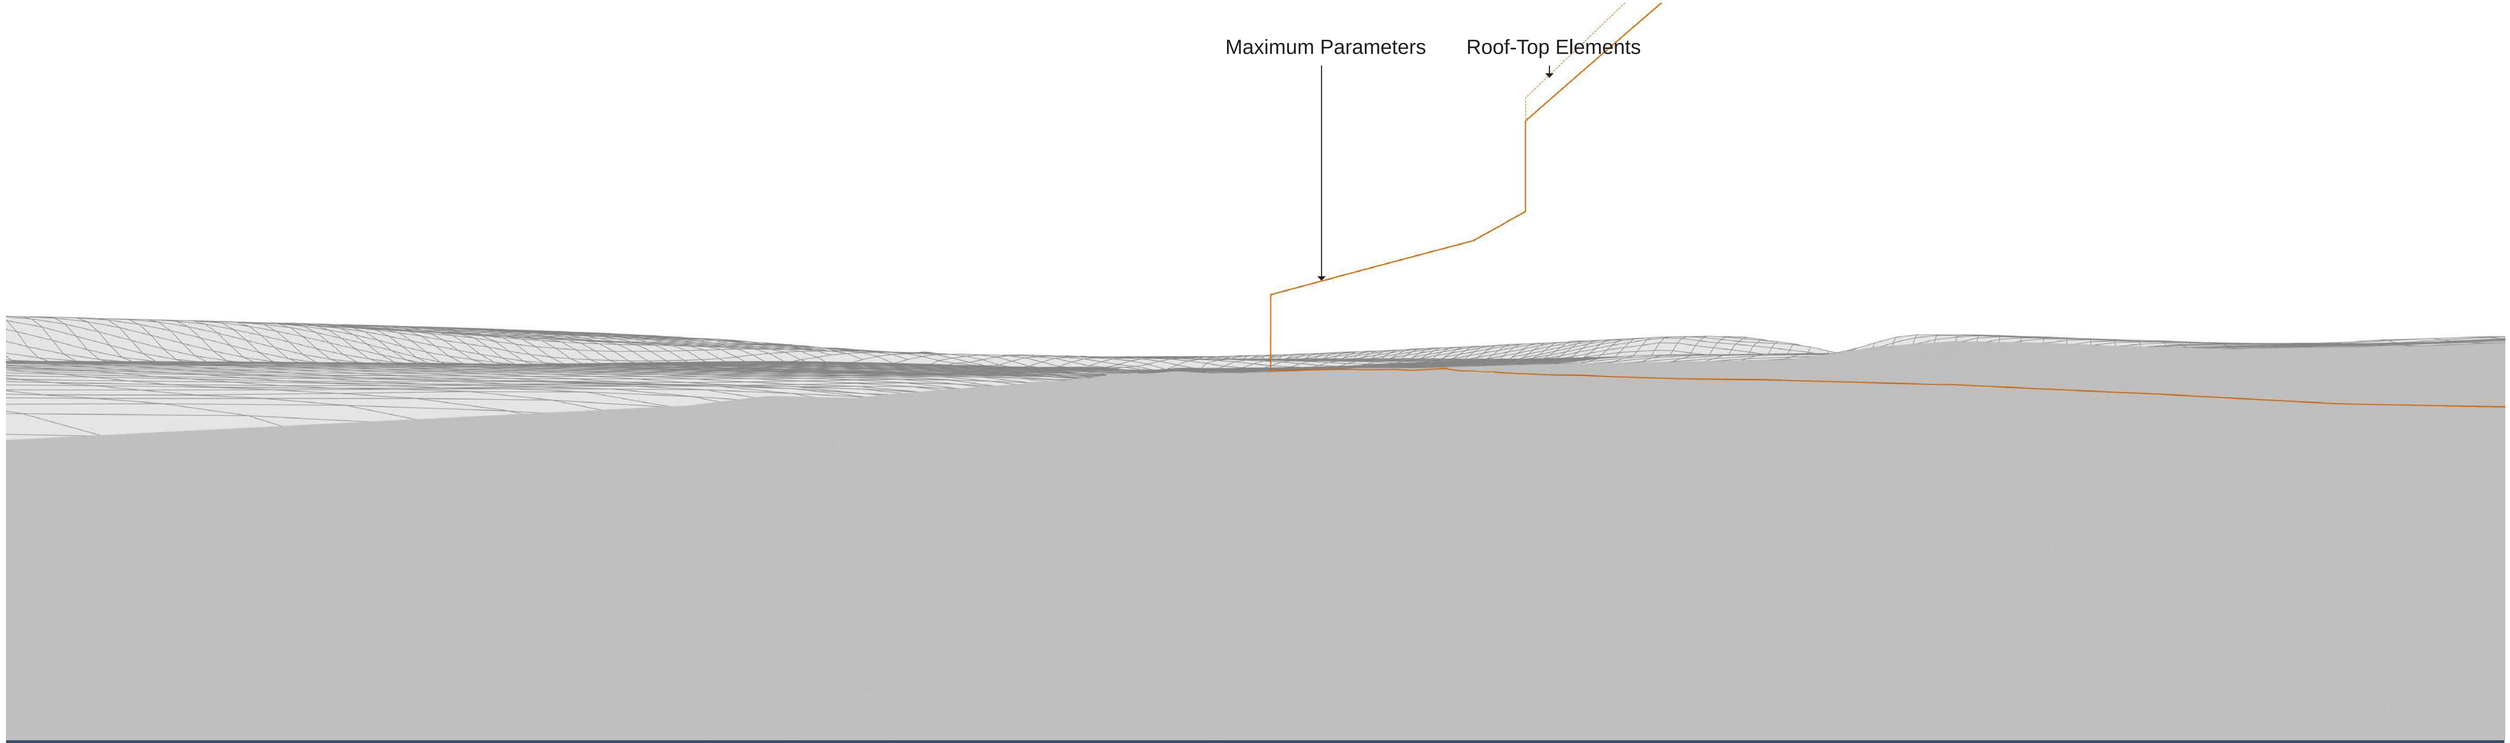

This viewpoint visualisation is spread across a single sheet 841mm wide and 297mm high.
To give the correct viewing distance the sheet should be printed at a scale of 1:1 on large format paper and cut to size. **Do not print at A3**

This photograph and visualisation is a cylindrical projection panorama. Hold this sheet at a comfortable arm's length from your eyes and curve the image through 90° and turn head to view. Alternatively, the visualisation can be laid flat and viewed by scanning left or right parallel to the sheet maintaining a 50cm viewing distance between your eye and the page.

This visualisation is a tool for assessment and is best used for comparison in the field from the viewpoint location shown. It cannot be considered a substitute for visiting the viewpoint location.

Technical Information

The technical photography, accuracy of 3D modelling and generation of visualisation is an Accurate Visual Representation. This is explained and presented in the accompanying Technical Methodology.

Printing Note

This viewpoint visualisation is spread across a single sheet 841mm wide and 297mm high.
To give the correct viewing distance the sheet should be printed at a scale of 1:1 on large format paper and cut to size. **Do not print at A3**

Viewing Information

This photograph and visualisation is a cylindrical projection panorama. Hold this sheet at a comfortable arm's length from your eyes and curve the image through 90° and turn head to view. Alternatively, the visualisation can be laid flat and viewed by scanning left or right parallel to the sheet maintaining a 50cm viewing distance between your eye and the page.

This visualisation is a tool for assessment and is best used for comparison in the field from the viewpoint location shown. It cannot be considered a substitute for visiting the viewpoint location.

Technical Information

The technical photography, accuracy of 3D modelling and generation of visualisation is an Accurate Visual Representation. This is explanied and presented in the accompanying Technical Methodology.

Printing Note

This viewpoint visualisation is spread across a single sheet 841mm wide and 297mm high.
To give the correct viewing distance the sheet should be printed at a scale of 1:1 on large format paper and cut to size. **Do not print at A3**

Reproduced from OS digital map data © Crown copyright 2025. All rights reserved. Licence number 0100031673. All Photography and Geo-Referencing undertaken by MSEnvsion Ltd and fully compliant with LI TGN 06/19. Type 4 Accuracy. www.msenvision.co.uk

Viewing Information

This photograph and visualisation is a cylindrical projection panorama. Hold this sheet at a comfortable arm's length from your eyes and curve the image through 90° and turn head to view. Alternatively, the visualisation can be laid flat and viewed by scanning left or right parallel to the sheet maintaining a 50cm viewing distance between your eye and the page.

This visualisation is a tool for assessment and is best used for comparison in the field from the viewpoint location shown. It cannot be considered a substitute for visiting the viewpoint location.

Technical Information

The technical photography, accuracy of 3D modelling and generation of visualisation is an Accurate Visual Representation. This is explanied and presented in the accompanying Technical Methodology.

Printing Note

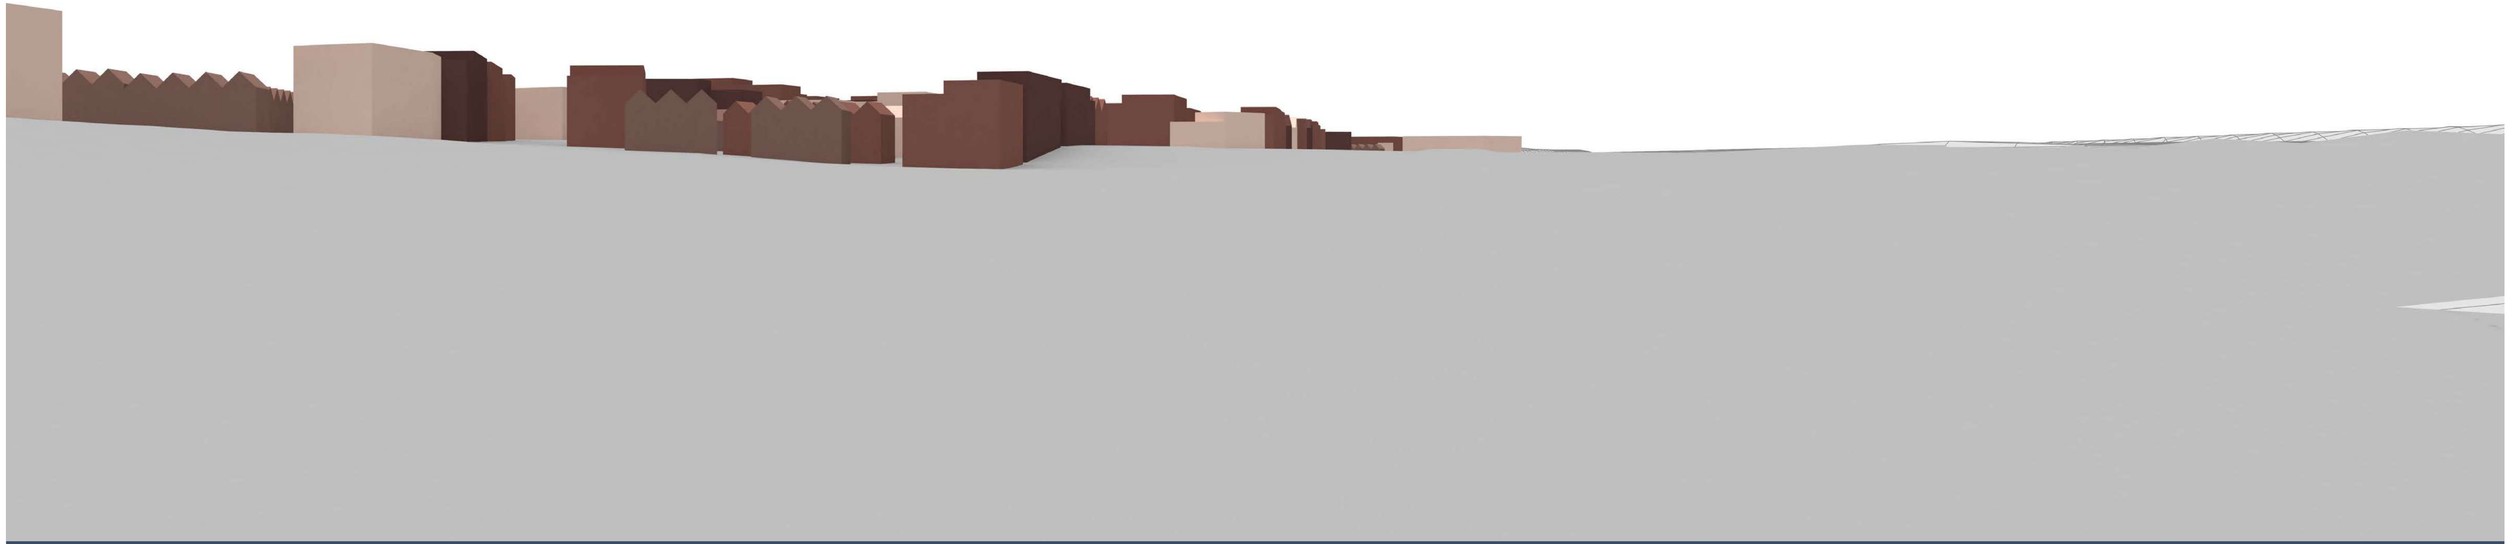

This viewpoint visualisation is spread across a single sheet 841mm wide and 297mm high.
To give the correct viewing distance the sheet should be printed at a scale of 1:1 on large format paper and cut to size. **Do not print at A3**

Reproduced from OS digital map data © Crown copyright 2025. All rights reserved. Licence number 0100031673. All Photography and Geo-Referencing undertaken by MSEnvsion Ltd and fully compliant with LI TGN 06/19. Type 4 Accuracy. www.msenvision.co.uk

Viewing Information

This photograph and visualisation is a cylindrical projection panorama. Hold this sheet at a comfortable arm's length from your eyes and curve the image through 90° and turn head to view. Alternatively, the visualisation can be laid flat and viewed by scanning left or right parallel to the sheet maintaining a 50cm viewing distance between your eye and the page.

This visualisation is a tool for assessment and is best used for comparison in the field from the viewpoint location shown. It cannot be considered a substitute for visiting the viewpoint location.

Technical Information

The technical photography, accuracy of 3D modelling and generation of visualisation is an Accurate Visual Representation. This is explanied and presented in the accompanying Technical Methodology.

Printing Note

This viewpoint visualisation is spread across a single sheet 841mm wide and 297mm high.
To give the correct viewing distance the sheet should be printed at a scale of 1:1 on large format paper and cut to size. **Do not print at A3**

Viewing Information

This photograph and visualisation is a cylindrical projection panorama. Hold this sheet at a comfortable arm's length from your eyes and curve the image through 90° and turn head to view. Alternatively, the visualisation can be laid flat and viewed by scanning left or right parallel to the sheet maintaining a 50cm viewing distance between your eye and the page.

This visualisation is a tool for assessment and is best used for comparison in the field from the viewpoint location shown. It cannot be considered a substitute for visiting the viewpoint location.

Technical Information

The technical photography, accuracy of 3D modelling and generation of visualisation is an Accurate Visual Representation. This is explained and presented in the accompanying Technical Methodology.

Printing Note

This viewpoint visualisation is spread across a single sheet 841mm wide and 297mm high.
To give the correct viewing distance the sheet should be printed at a scale of 1:1 on large format paper and cut to size. **Do not print at A3**

This photograph and visualisation is a cylindrical projection panorama. Hold this sheet at a comfortable arm's length from your eyes and curve the image through 90° and turn head to view. Alternatively, the visualisation can be laid flat and viewed by scanning left or right parallel to the sheet maintaining a 50cm viewing distance between your eye and the page.

This visualisation is a tool for assessment and is best used for comparison in the field from the viewpoint location shown. It cannot be considered a substitute for visiting the viewpoint location.

Technical Information

The technical photography, accuracy of 3D modelling and generation of visualisation is an Accurate Visual Representation. This is explanied and presented in the accompanying Technical Methodology.

Printing Note

This viewpoint visualisation is spread across a single sheet 841mm wide and 297mm high.
To give the correct viewing distance the sheet should be printed at a scale of 1:1 on large format paper and cut to size. **Do not print at A3**
